DETAILED ACTION

1. This action is in response to applicant's amendment received on 11/21/06.

Specification

2. The amendment filed 08/05/05 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: Figures 1 and 2 were not previously presented or disclosed in the specification as original filed. Also, Figures 3 and 4 illustrate cutting edges arranged radially outwards with respect to the periphery of the disk and screws for connecting the inserts to the disk, were not previously presented or disclosed in the specification as original filed.

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 112

3. Claims 4, 6-8 and 9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The following subject matter were not described in the specification: a motor spindle and a motor spindle comprising a spindle.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 4, 6-8 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Wayne (5,129,296).

Wayne discloses (Fig. 1-9) the invention including a disk having a diameter of 18 inch, inserts 22 on a range of 10-30, a motor having a spindle (see col. 3, line 50). Regarding cutting speeds, Wayne is capable of perform speed at 10-100m/s or 20-60 m/s if we set the rpm to 3000 and annular cutting tools 22 provided on the radial periphery and attacking in a radial direction (see Fig. 5-6). Also, Wayne is capable of cutting elastomer with a surface of a roller having a shore of hardness in the range of 10 Shore A to 100 Shore D (see col. 4, line 23).

Response to Arguments

Applicant's arguments have been fully considered but they are not persuasive. Applicant argues that Wayne doesn't show "a motor spindle that is structured to cut in the radial direction". However, Wayne teaches a motor spindle (see col. 3, line 50) having a disk with annular cutting tools 22 provided on the radial periphery and attacking in a radial direction (see Fig. 5-6).

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
